

Report on School Picnic

"Nature is the best classroom, and every trip a lesson in joy".

On 19th September 2025, our school organized a much-awaited picnic for the students of Classes XI and XII to Sonamarg, the “Meadow of Gold.” The purpose of the trip was to provide students with a refreshing break from academics and an opportunity to enjoy nature.

The day began early, with students assembling at the school by 6:30 a.m. Excitement filled the air as the buses departed, and the journey was filled with laughter and fun moments together.

*On reaching Sonamarg, the group first visited the **Tourism Park**, where students relaxed and admired the beautiful surroundings. A delicious lunch was enjoyed at the park, after which students played outdoor games and spent time together in groups. The students then visited **Fish Park**, engaging in activities such as **water zorbing and boat rides**, adding excitement before calling it a day.*

As the buses returned in the evening, the students carried back not only wonderful memories but also a sense of joy and renewed energy. The trip was more than just recreation—it was a reminder of the importance of balancing study with relaxation.

The smooth execution of the picnic was made possible by the dedicated efforts of the management, teachers and supporting staff, whose commitment ensured that the day remained not only enjoyable but also safe and well-coordinated.
