

WINTER ASSIGNMENT WORK FOR CLASS - NURSERY

Session 2025-26

Dear Parents,

The winter break from school is often filled with travel plans and fun activities. However, it is important to keep children engaged in learning during these weeks. Keeping this in mind, we have carefully designed the winter assignment and planned it in a way that helps students learn through a variety of interesting activities. This activity-based assignment aims to foster curiosity, develop creativity, enhance knowledge, and instill the joy of learning in our little learners.

Kindly go through the following points

There are many ways in which you can support your child in gaining knowledge, understanding and confidence as well as strengthen the parent-child bond.

- Limit screen time and inculcate reading habit instead. Expose your child to story books. Grab short story books with pictures and read out one story to your child daily/ weekly. You can use the same books for picture reading. You can even narrate stories to your child with some moral values. It will not only teach your child new words but help them to write better and speak well.
- Play simple games with them; involve them in little household chores.
- Make simple conversations. Share your childhood stories with your little ones during this winter time. These moments during the winter break will create quality time and lasting memories for both you and your child.
- Try to communicate in English with your child and encourage them to use short sentences in their daily routine, such as :
Can I go out.
May I drink water.
Shut the door, please! Etc.
- Make proper use of these holidays, encourage your child to eat independently and to go to washroom by themselves if they are not proper toilet trained.
